Who Else Wants To Boost Their Credit Score To Repair Financial Damage Constantly Hanging Over Your Head?

They're smiling but they don't trust you.

A polite nod here, a chuckle there. Meanwhile they're anxiously waiting for your credit report. You know it hurt your chances of getting the loan when you had to admit to some small financial mistakes in the past.

As you leave the office with that sick feeling telling you you've already lost, they state the inevitable, "We'll let you know."

Less than perfect credit is not a permanent situation. If you've made financial mistakes in the past (and who hasn't), it's not too late to start repairing your credit today. When you know the little tips and tricks you can use to convince the credit bureau's your trust worthy...

...you can leave the loan officer's chair confident that the deal will have a happy ending. It's all about knowing how to play the credit game. And you can play the game like a master with...

How Much is Poor Credit Costing You?

As you increase your credit score, you'll qualify for lower interest rates. This means that you pay less to borrow the same amount, resulting in a savings to you.

For example, the following chart shows what interest rate and monthly payment you could expect to pay on a \$150,000.00 30-year fixed-rate mortgage:

Credit Score	Interest Rate	Monthly Payment	Total Interest Paid
720-850	5.57%	\$858	\$158,880
700-719	5.69%	\$870	\$163,200
675-699	6.23%	\$922	\$181,920
620-674	7.38%	\$1,037	\$223,320
560-619	8.53%	\$1,157	\$266,520
500-559	9.29%	\$1,238	\$295,680

Your monthly payment can fluctuate by 30 percent, just based upon your credit score alone! More importantly, the total amount of interest paid throughout the term of the loan can fluctuate by as much as 50 percent.

In the above example, a borrower with a credit score in the 500-559 range can expect to pay up to \$130,000.00 more in interest than a borrower in the 720-850 range over the same 30-year term. Don't be a victim of an inaccurate credit score.
